

The Platform

Turn fragmented data into in-moment decisions that improve health outcomes, revenue integrity, and EBITDA.

	What It Does	Differentiator	Results	Who Benefits
Acquire	Build the most complete patient history	Multi-source retrieval (digital + manual)	98% high-value medical records retrieved	Providers, Health Plans, ACOs
Inspect	Identify and validate risk conditions	Clinically trained AI with fewer false positives	+1.4 HCCs identified vs. existing processes	Providers, Coders, Plans
Engage	Deliver insights at the point of care	In-workflow, clinician-ready summaries	50% ↑ physician engagement with HCCs	Providers, Plans, ACOs
Optimize	Ensure RAF & revenue integrity	Full lifecycle tracking + targeted validation	12:1 ROI	Coders, Compliance, Plans

Case Study

Credo Delivers 112% Higher RAF vs. Competitor from the Same Patient Cohort

Overview

A national value-based care organization tested Credo against a leading vendor on a 500-patient high-risk Medicare cohort. Both were tasked with sourcing records, identifying HCCs, and delivering findings to clinicians.

Results

- Accepted HCC rate: Credo 55% vs. Competitor 30%
- Net-new accepted HCCs: Credo 425 vs. Competitor 200
- Outcome: 112% increase in RAF from the same population

Why Credo Won

Acquire
Broader record access via HIEs, integrations, onsite retrieval.

Inspect
Precision-first inferencing with clear evidence clinicians trust.

The Impact

Credo’s approach drove 2X provider adoption and yielded better documentation accuracy without adding provider burden or audit risk.

Unlock the Full Picture of Patient Risk

Credo transforms value-based care with AI-driven chart retrieval and analytics, surfacing evidence-rich insights directly at the point of care and beyond.

The Challenges

- 01 **Incomplete patient histories** lead to inaccurate risk stratification.
- 02 **Fragmented, unstructured data** hides valuable insights in clinical notes, imaging, and labs.
- 03 **Claims based suspecting** produces weaker insights with limited clinical support.
- 03 **Limited physician engagement** prevents effective risk-adjustment adoption.

Our Solution

Credo ensures that every value-driving encounter is identified, documented, and surfaced for action.

Acquire: Pulls in the most complete set of medical charts from every possible source, digital and manual.

Inspect: Surfaces accurate, evidence-backed risk and quality insights providers can trust.

Engage: Delivers clear, clinical evidence summaries and prompts directly in the workflow.

Optimize: Tracks diagnoses from identification through reimbursement to ensure the most accurate RAF and strongest revenue integrity.

1.7x

Increase in ICDs accepted per patient

37%

Increase in provider engagement at point of care

.176

Average net-new RAF accepted per patient

Seamlessly Integrated with Leading EHRs
